

GULFPORT FIRE DEPARTMENT

Home Fire Safety Inspection

In the United States, 85% (3,420) of all fire deaths occur in the home. The three leading causes of residential fires are heating, cooking, and electrical malfunction. The Gulfport Fire Department is committed to helping protect your family from a fire injury or death. As part of this pledge, we offer free home fire safety inspections to citizens in our community. We will identify fire hazards in your home and provide safety tips for prevention and escape in the event of a fire.

Please call the City of Gulfport (727) 893-1000 to schedule a free Home Fire Safety Inspection or go the City's Web Site at www.ci.gulfport.fl.us - select Most Requested Pages, select Documents and Publications, select Home Fire Safety Check List and do the Home Fire Safety Inspection yourself.
